

TEKUN Corporation Collection Partnership Pack

Start here: one guide to the complete proposal, presentations, sourcebook and evidence base

Document control	Detail
Pack status	Locally compiled and reviewed
Compilation date	1 September 2026
Prospective client	TEKUN Corporation Sdn Bhd
Classification	Confidential, internal master pack
Recommended first action	Read this guide, then choose the document that matches your audience
External sharing	Use only the separate controlled external review pack and complete its circulation gates first

1. The partnership in one minute

TEKUN Corporation is an established collection operator. The proposed partnership would combine:

- 1. TEKUN Corporation's relationships, policy and authority;**
- 2. a TEKUN Corporation-owned and governed collection platform;**
- 3. our team's platform design, build, operation, maintenance and authorised managed collection capability;**
and
- 4. shared measurement, customer-treatment controls and continuous improvement.**

The immediate decision is not to approve a price, launch date or guaranteed collection result. It is to authorise a governed discovery and pilot co-design programme, then decide whether to implement and expand based on evidence.

2. Which document should I open?

If you need to...	Open this	Audience	Sharing rule
Understand the whole partnership quickly	Executive stakeholder presentation	Leadership, board and decision-makers	Controlled external use after circulation gates
Review the proposed scope, operating model and governance in detail	Controlled external proposal	Leadership, procurement, finance, compliance, legal, privacy and technology	Controlled external use after circulation gates
Prepare the delivery team or build a more technical presentation	Internal technical and operations deck	Internal product, engineering, operations, finance, compliance and management	Internal only
Find the complete governed explanation behind every document	Partnership sourcebook	Internal owner, proposal team and specialist reviewers	Internal master source; share only by exception
Check whether a statement is proven, interpreted or still unknown	Research and evidence pack	Internal research, legal, compliance and proposal reviewers	Internal only
Understand audience boundaries and the completed review	Governance and acceptance documents	Document owner and future editors	Internal only

3. The five core documents

A. Executive stakeholder presentation

- **Purpose:** secure agreement to proceed into governed discovery and pilot co-design.
- **Length:** 18 slides.
- **Best format for presenting:** interactive HTML.
- **Best format for reading or sending:** PDF.
- **What it contains:** opportunity, partnership model, ownership, platform and operating model, safeguards, capability evidence, milestones, roadmap and recommended decision.
- **What it does not contain:** pricing, guaranteed improvement, final legal conclusions or detailed internal architecture.

- [tekun-executive-stakeholder-deck.pdf](#)
- [tekun-executive-stakeholder-deck.md](#)

B. Controlled external proposal

- **Purpose:** provide enough business, operational, technical and assurance detail for structured stakeholder review.
- **Length:** 25 A4 pages.
- **Best format for formal review:** PDF.
- **Editable handover format:** DOCX.
- **What it contains:** proposition, scope, responsibilities, lifecycle, platform model, managed service, customer treatment, performance framework, pilot, roadmap, transition and discovery agenda.
- **What it does not contain:** final pricing, provider assumptions, private portfolio facts, guaranteed results or legal advice.

Source files:

- [tekun-controlled-external-proposal.pdf](#)
- [tekun-controlled-external-proposal.docx](#)
- [tekun-controlled-external-proposal.md](#)

C. Internal technical and operations deck

- **Purpose:** give internal teams enough shared knowledge to explain, design and prepare the proposed solution.
- **Length:** 35-slide core briefing plus a 7-slide reference appendix.
- **What it contains:** stakeholders, system layers, records, workflows, customer treatment, payment and reconciliation, security, integrations, service management, team model, KPIs, pilot, roadmap, risks and discovery questions.
- **Important:** this deck has internal operating depth and must not be included in an external package.

- [tekun-internal-technical-operations-deck.md](#)

D. Governed partnership sourcebook

- **Purpose:** act as the full knowledge base and authoritative narrative source for future presentations, proposals and discussions.
- **Length:** 46 A4 pages, 28 chapters and supporting appendices.
- **What it contains:** plain-language business meaning, detailed operating and technical explanation, evidence boundaries, milestones, KPI framework, pilot design, roadmap, risk and decision model.
- **Rule:** future derivative documents should preserve its distinction between established facts, public statements, proposed design, conditions and illustrations.

- [tekun-collection-partnership-sourcebook.docx](#)
- [tekun-collection-partnership-sourcebook.md](#)

E. Research and evidence pack

- **Purpose:** show how the conclusions were reached and prevent unsupported claims from entering stakeholder material.
- **Scale:** 114 registered claims and 36 registered sources.
- **Start with:** the research handback and executive research brief.
- **Key boundary:** no current third-party provider, contract value or commission model was publicly verified; these remain discovery questions.

4. How the documents relate

Research and public evidence

Governed partnership sourcebook

Audience and disclosure rules

Executive deck decision summary	External proposal controlled detail	Internal technical deck delivery knowledge
------------------------------------	--	---

Confidential — controlled stakeholder use

The sourcebook governs the story. The research pack governs the claims. The derivative contract and extraction matrix govern what each audience receives.

5. Recommended reading paths

For Hafiz or the proposal owner

1. This Start Here guide.
2. Executive stakeholder presentation.
3. Controlled external proposal.
4. Review and acceptance record.
5. Sourcebook only when deeper clarification is needed.

For a TEKUN Corporation leadership discussion

1. Executive stakeholder presentation.
2. Controlled external proposal as the follow-up document.
3. Do not send the complete internal pack.

For internal presentation creators

1. Executive stakeholder presentation for the agreed story.
2. Internal technical and operations deck for deeper explanation.
3. Sourcebook for authoritative detail.
4. Claim register before adding any new factual statement.

For legal, compliance, privacy or procurement review

1. Controlled external proposal.
2. Sourcebook Chapters 2, 5, 7, 11–14, 16 and 20–27.
3. Regulatory research and claim register.
4. Unknowns and discovery questions.

6. What is established, proposed and still unknown

Category	Current position
TEKUN Corporation collection history	Publicly evidenced as an established operating business
Our platform-operating history	Operating since 2018; the new SIMS went live in May 2025
Dedicated TEKUN collection platform	Proposed design, not a current TEKUN capability
Managed collection operation by our team	Proposed and subject to authority, regulatory, staffing and commercial agreement
Platform ownership	Proposed to remain with TEKUN Corporation
Current incumbent provider	Not publicly identified
Current provider fees or commission	Not publicly disclosed
Portfolio volumes and baseline performance	Requires TEKUN discovery
Final legal and regulatory applicability	Requires portfolio-specific confirmation and qualified advice
Price, service levels and launch date	Not decided; discovery and costing inputs are still required

7. Roadmap summary

Horizon	Purpose	Evidence required before moving forward
H0: Align and baseline	Establish shared truth, authority, portfolio map and KPI definitions	Approved discovery outputs
H1: Trusted operating foundation	Make one bounded portfolio visible, controlled and auditable	Data, authority and control readiness
H2: Controlled pilot	Run authorised work with treatment and evidence controls	Agreed pilot cohort and guardrails
H3: Integrated performance scale	Automate feeds, reconciliation, reporting and capacity planning	Acceptable performance, conduct and platform-health evidence
H4: Multi-principal growth	Reuse the foundation with segregated policy, data and reporting	Proven onboarding and governance model
H5: Governed intelligence	Use clean history for explainable assistance, forecasting and strategy	Data quality, governance and human-authority approval

8. External circulation gates

Before sending the executive deck or controlled proposal outside the internal team:

1. confirm the proposing legal entity and its relationship to the Sifututor operating capability;
2. add the authorised proposal contact;
3. confirm the intended recipients and confidentiality treatment;
4. reverify volatile public and regulatory sources;
5. obtain appropriate legal, compliance and privacy review for portfolio-specific statements;
6. keep the internal deck, sourcebook, research pack and governance files out of the external package;
7. do not add pricing, targets, guarantees or implementation commitments without evidence and owner approval.

9. Package structure

Two compiled ZIP files accompany this guide:

- **Complete Internal Pack:** every reader-facing document, the research evidence and the governance material. This is the internal knowledge base.
- **Controlled External Review Pack:** only the executive presentation, controlled proposal and external read-me. This is the candidate pack for authorised stakeholder review after the gates above are completed.

Rendering scripts, raw diagram-production files and temporary QA artifacts are intentionally excluded from the reader bundles. They remain in the workspace for future document maintenance.

10. Current acceptance state

The sourcebook and three audience-specific derivatives were locally rendered, reviewed and accepted. Deterministic package checks, slide overflow checks and executive presentation interaction checks passed. No document has been committed, uploaded, published, sent to TEKUN Corporation or externally approved.

The next business action is owner review of the executive PDF, followed by confirmation of the proposing entity, authorised contact and external recipient list.
